

Call for abstracts

Physiotherapy UK 2020 will take place on 13th and 14th November, at the Birmingham ICC.

The Chartered Society of Physiotherapy is inviting abstract submissions for platform and poster presentations.

Submission deadline: 23rd March 2020

Submission guidelines

Please read this information carefully before proceeding to the online submission form.

All submissions must be made online via the conference website <http://www.physiotherapyuk.org.uk/>. Submissions by email will not be accepted.

Timetable:

16 th January 2020	Submission opens
23 rd March 12.00pm GMT	Submission deadline
Week commencing 1 st June	Notification of outcome

Conference themes

This world-class event aims to bring together physiotherapy practitioners, educators, managers and researchers to showcase advances in physiotherapy and responses to changing population, patient and service delivery needs.

The comprehensive programme offers physiotherapy practitioners from a wide range of backgrounds a collaborative learning opportunity to: hear about advances in physiotherapy, engage in discussions, and share knowledge and expertise in the pursuit of demonstrating the value and impact of physiotherapy.

In the centenary year of the CSP we will be celebrating the best of physiotherapy by showcasing the latest evidence, innovations and leadership. The call for abstracts is open to all aspects of physiotherapy which include service delivery, clinical practice, research and education, that address any of the five conference themes:

Managing Complex Pain

This theme explores contemporary physiotherapy practice, across all specialisms, that draws on psychologically informed and social approaches to support people, throughout their lifespan, living with complex pain conditions.

Delivered in partnership with the Physiotherapy Pain Association (PPA).

Exercise and Decision Making

As a core pillar of physiotherapy practice, exercise is the golden thread that underpins many physiotherapists' interactions with patients and the population. This theme will build on the learning of physiotherapists involved in sport and exercise at all levels from recreational athletes and general population through to professional and elite athletes. The decision-making and clinical reasoning processes relating to optimal loading and periodisation will have echoes throughout the profession to enable an enhanced understanding of several core principles. Delivered in partnership with The Association of Chartered Physiotherapists in sports and exercise medicine (ACPSEM)

Leading for Change

Preparing the workforce to be fit for the future

With changing models of care and a rapid growth in technology and innovation, advances in practice and service delivery are required. This theme explores how the workforce needs to develop to be fit for the future from support workers to advanced practitioners.

Managing Multi System Trauma

This theme explores the integrated approach to the rehabilitation of patients who have suffered major system trauma, complications both physical and psychological and require multi systems support across the whole pathway.

Delivered in partnership with Association of Trauma and Orthopaedic Chartered Physiotherapists (ATOCP) and Association of Chartered Physiotherapists in Respiratory Care (ACPRC)

Ageing Well

In the context of an ageing population where more care is delivered closer to home and a current focus on prevention and community rehabilitation, this theme explores how physiotherapy is at the forefront of new models of care, service delivery and workforce development in response to increasing demand.

Delivered in partnership with Chartered Physiotherapists working with Older People (AGILE).

Methodologies

Abstracts are invited using the following methodologies:

Qualitative*

Quantitative*

Mixed Methods*

Clinical Audit

Service Evaluation and Improvement

Systematic review

*Submissions with pending results will not be accepted.

Further details on how to categorise studies (whether relating to research, service evaluation, clinical audit, etc.) can be found here: http://www.hra-decisiontools.org.uk/research/docs/DefiningResearchTable_Oct2017-1.pdf

Presentation formats

Selected abstracts may be presented in one of the formats outlined below. Full guidance on all presentation formats will accompany the results of the abstract selection process.

- **Platform**

A platform presentation of 15 minutes, including a question and answer session.

- **Rapid 5**

A short platform presentation of five slides, covering key points.

- **Poster**

Posters are reports summarising information using brief written statements and graphic materials (e.g. graphs, charts, figures and photographs).

Posters accepted for display must be produced according to the CSP guidance issued to the successful authors. It is not possible to display posters that do not adhere to the guidelines.

Posters will be on display during exhibition hours. There will be an opportunity for presenters to discuss their poster with delegates, with presenters assigned a specific time to be at their poster. In addition, activities will be organised to promote posters and to encourage delegates to visit the poster display area.

Selection process

Submitted abstracts are considered via a blind peer-review process. Each abstract will be reviewed by three reviewers. Selection criteria are used to review and score all submissions. The abstract moderation group will moderate any abstracts that receive scores with a large variance. See appendix 1 for full selection and scoring criteria.

Attendance

Attendance at Physiotherapy UK is a requirement should your abstract be accepted for conference. You will be required to book your own place, Bookings should be made through the conference website:

<http://www.physiotherapyuk.org.uk/>.

Submission guidelines

Each submission must be made electronically via the Physiotherapy UK 2020 website: <http://www.physiotherapyuk.org.uk/> by the **deadline of 23rd March 2020 12.00pm.**

All subsequent correspondence regarding the abstract will be with the person who submits the abstract online. The presenting author must be named in the abstract but does not have to be the first named author.

The online submission form provides restricted space for data entry. Word count limits are indicated below.

Please take time to check your submission carefully to make sure that your text is submitted as intended. Having entered your abstract online, you will be able to amend it up to the submission

Abstracts received after the deadline will not be accepted.

Submissions must include the following:

- a) Title of abstract [maximum 20 words]
- b) Names of presenter and co-authors
- c) Contact details of all authors to include:
 - i. full name, organisation/institution, city and country, as you would wish it to appear in the programme
 - ii. e-mail, work telephone, mailing address for the submitter
- d) Relevance to conference theme(s) (50 words)
- e) Brief biography of presenting author [150 words]
- f) Information concerning any presentations or publications of the work made prior to conference (see General information, point 13) [maximum 50 words]
- g) Ethical review

This section is very important and many abstracts 'fall down' here. If you are undertaking research in health and social care, independent ethical review is a legal requirement. We expect each author to have abided by the requirements of their country/organisation.

It is recommended, for work based within the UK that you use the HRA decision-making tool to confirm whether ethical approval was required or not: <http://www.hra-decisiontools.org.uk/research/>

Further guidance and a definition of what constitutes research activity can be found via the Health Research Authority: http://www.hra-decisiontools.org.uk/research/docs/DefiningResearchTable_Oct2017-1.pdf

Please also view the CSP’s guidance on ethical approval requirements found here: <http://www.csp.org.uk/professional-union/research/doing-research/ethics-governance>

If ethical approval was required, the name of the ethics committee that gave approval, the date approval was given and any reference numbers should be provided.

If ethical review was not required, please provide a clear rationale for this decision and explain how you checked this. If you used one of the decision tools above state this within your answer.

h) The completed abstract [maximum 500 words covering items shown below; references not required]. Abstracts will be included in the conference proceedings and must be structured using the following headings:

Heading	Notes
Title	
Author(s)	
Purpose	What was the major reason for undertaking the project/sharing your activity? What was your aim and objectives?
Methods	What principles, methods / methodological approaches, materials did you use?
Results	What were your main findings from your analysis?

Conclusion(s)	Discuss your findings and what have you concluded from the study? What are your suggestions for future work?
Impact	What is the potential impact of the project? How will the results be implemented into physiotherapy practice / management / education / research / policy?
Three key words	Up to three words that describe your work and reflect at least one of the programme themes.
Funding acknowledgements	Please acknowledge all funding sources that supported your work. If the work was unfunded, please state this.

**No images, tables or graphs are permitted.
 References are not required**

Requirements

1. Abstracts, presentations and posters must be submitted in English.
2. An abstract must be submitted for each proposed presentation.
3. The maximum word limit for each abstract is 500 words.
4. An abstract should be in line with at least one of the conference themes.
5. Each prospective presenter may submit and present a maximum of three abstracts. An individual may be named on other abstracts as a co-author, but only as presenting author on up to three.
6. The presenting author must register to attend the conference and be available at the allocated presentation time.
7. If no author is available to present a selected abstract, it will be withdrawn from the programme.
8. All presentations must describe original work to which all the authors listed have made a significant contribution. Any reference to personal experience should be clearly labelled as such.
9. All abstracts and presentations must adhere to the use of “people-first” language. A person must not be referred to by disability or condition, and terms that could be considered biased or discriminatory in any way should not be used (e.g. use “person with a stroke” instead of “stroke patients”).
10. Any source of funding or support for the work being presented needs to be acknowledged.
11. Each abstract submission must indicate if the material has been or will be published or presented at another national or international meeting prior to Physiotherapy UK 2020. Abstracts for previously published or presented work will be considered only if they are unlikely to have reached the UK physiotherapy audience and if the authors take responsibility for providing any copyright clearance needed for inclusion in the event proceedings or other Physiotherapy UK 2020 publications.
12. Contributors should not use these sessions for marketing opportunities for new products, equipment or organisations, nor use the presentation time to speak badly of competitors’ products.

13. Presenters are requested to disclose actual or potential conflicts of interest regarding their presentation in the first slide. This will allow the audience to take potential conflicts of interest into account when assessing the objectivity of the presentation
14. Presentations are expected to communicate the same information as your abstract submission, although it can be adapted for the presentation style e.g. adding charts/images/tables and summarising key points. No exceptions will be made.
15. When completing the online submission process the submitter will be asked to confirm that the presenting author has read and understood the requirements, consent and general information they are expected to fulfil.

Consent, permissions and copyright

In submitting an abstract you must confirm that:

- you accept responsibility for the accuracy of the submitted abstract and understand that the content cannot be modified or corrected after the submission deadline and that it will be published exactly as submitted
- all co-authors are aware of and agree to the content of the abstract and support the data presented
- the submitter accepts responsibility as the contact person for all correspondence about the abstract and to share information with all authors about its status
- you have secured any copyright/permissions clearance required relating to any previous presentations, equipment or other material for inclusion in Physiotherapy UK 2020, its proceedings or other conference publications
- for all studies involving human participants or animal subjects, permission has been obtained from the relevant regulatory authority and informed consent given where appropriate
- anyone who is identifiable in the abstract and presentation has given their consent to be included

- the work is original, except for extracts from copyrighted works used with permission from the copyright holders, and that it does not infringe upon any copyright, proprietary, or personal right of any third party
- you have identified any potential conflicts of interest e.g. financial interest in products or processes described in the abstract, stock ownership, membership on an advisory board or board of directors, or other substantive relationships

On behalf of all authors the submitter will confirm:

- Transfer of copyright of the symposium abstract/s presented at Physiotherapy UK 2020 to the CSP to publish electronically and in other formats (e.g. conference website, programme, print materials, the CSP's open access Innovations in Physiotherapy database). The author retains the right to publish their research elsewhere, or use the research for personal use or as part of their work, providing it does not compromise the CSP's copyright. The CSP does not assume any liability or responsibility for publication of any submitted abstracts.
- consent to have authors' names, affiliation and biographical material used in connection with the publication of the work

General information

16. It is the author's responsibility to submit a correct abstract. Any errors in spelling, grammar or scientific fact will be reproduced as typed by the author.
17. Only one presenting author per paper is permitted. Only one author may present the abstract, if selected.
18. Any changes to the presenting author must be made through the abstract submission page. Changes will be incorporated into the final programme if there is sufficient time, but thereafter no further changes will be reflected in the programme.
19. Notification of outcome of the abstract review process will be sent to the submitter. Only the person who submits the abstract online will receive email communication about the abstract. She/he is responsible for informing all co-authors about the outcome of the abstract's submission.
20. The scheduling of all presentations will be determined by the CSP to ensure best fit with the overall event programme. Any requests for specific dates and times cannot be considered. Similar abstracts in related topic areas will be grouped together for platform

presentation/rapid five and poster display. The final decision as to which theme the submitted and selected abstracts are allocated is at the discretion of the CSP.

21. All submitted abstracts will be anonymised and peer reviewed without knowledge of the identity of the author(s). The abstract submission tool ensures that the authors of an abstract cannot be identified during the review process.
22. Selection of abstracts will be based on how they are scored through the review process against the published criteria (see appendix 1).
23. The author(s) retain the right, after presentation at Physiotherapy UK 2020, to include the work in articles, books, or derivative works that he/she authors or edits provided said use does not imply the endorsement of the CSP.
24. All decisions of the CSP are final. This includes the format for which an abstract is accepted (platform presentation, rapid five or poster) and the allocation to a conference theme.
25. Honoraria, fees or payment of expenses will not be provided by the CSP for authors to present abstracts at Physiotherapy UK 2020.

Acknowledgments

With grateful thanks to the 2019 Abstract Moderation Group, WCPT, ER-WCPT and the Council for Allied Health Professions Research for their contributions to the development of these guidelines.

Appendix 1 – Scoring Criteria

Appendix 1: Scoring Criteria

Screening questions

Physiotherapy UK aims to bring together physiotherapy practitioners, educators, managers and researchers to showcase advances in physiotherapy and responses to changing population, patient and service delivery needs.

1. Does the abstract fit with the theme? Yes/No*

<https://www.physiotherapyuk.org.uk/conference/themes/>

1.1. *If no please suggest a more appropriate theme. NB the final decision will be made by theme leads.

2. Was funding acknowledged Yes / No / N/A

3. Did this study require ethics approval from an ethics committee*? Yes / No

*For UK research in health and social care, independent ethical review is a legal requirement. If you are unsure if this study is research check [here](#)

3.1. If yes were approval details submitted Yes / No

3.1.1. If 3 = yes and 3.1 = No Should this abstract be reviewed regarding ethical approval by the Abstract Moderation Group? Yes / No

Each criterion is scored out of a possible 3. The table below gives descriptions of the scoring system against each criterion

Criteria	Score 3:	Score 2:	Score 1:	Score 0:
Do the aims and objectives make the purpose clear?	The abstract describes clear aims and objectives that are appropriate to the topic/research question	Aims and objectives adequately explain purpose	Purpose is poorly explained	Purpose cannot be understood
Do the methods/ analysis/ approach enable the questions to be answered?	The abstract's methods/analysis/ approach are clearly explained, rigorous and appropriate to the topic/research question	Approach/analysis/methods adequately explained and justifiable	Poor justification for approach/analysis/methods used	Little or no justification for the approach /analysis/methods used
Have the data/ findings been interpreted appropriately?	Data/findings are presented and interpreted with clarity	Data/findings presented adequately	Data/findings briefly presented but lack adequate detail	Data/findings insufficiently clear or misinterpreted
Are the discussion and conclusions consistent with the data/findings?	Findings of research/activity are discussed well, with clarity about strengths & weaknesses and messages/questions for discussion/further work clearly articulated	Findings of research/activity discussed with some interpretation and inference of further work	Poor explanation of findings of research/activity with poor inference of further questions/work	Findings of research/activity not explained

What is the potential impact of the study and how well will it translate into physiotherapy practice?	Study has significant potential impact and likely to be implemented widely	Study has some potential impact and likely to be implemented locally	Study has little potential impact and unlikely to be implemented	Study has no potential impact and no potential to be implemented
